

Water & Waste Infrastructure

Proven solutions - one building to entire complexes.

Easi-Set and Easi-Span Buildings are ideally suited for a multitude of uses in water and waste water facilities. Our licensed producers have worked all across North America installing single buildings, as well as working on design build teams to complete entire complexes. Our buildings can be customized to exacting specifications and to accommodate large equipment, tanks, and piping, or even installation around existing equipment. These durable precast concrete buildings are resistant to almost any degree of inclement weather, vandals, fires, blasts and UL 752 Level 5 ballistics. We can even design your building to withstand corrosive environments and chemicals, or for placement on piers in flood prone areas. Anything you want to keep out, stays out.

Pump Stations • Well Houses • Lift Stations • Headworks • Belt Filter Press • Blowers • SCADA • Boiler • Solids Processing
Reverse Osmosis Water Treatment • Meter Pit • Methanol & Chemical Storage • HazMat Containment • Generator Buildings
Operations and Control Buildings • Restrooms • Labs • Offices • Maintenance Buildings • Equipment Shelters • Storage & more

Pre-Engineered • Minimal Site Preparation • Delivered To Site Ready To Use • Maintenance Free • Durable • Sustainable
